 Box contents may vary depending on the type of test.

Strep A v2.0 Test Kit

Designed for self-testing, this rapid test offers a practical solution for detecting Group A Streptococcal infection at home. Its optimized formulation supports reliable performance, while the single-buffer system simplifies handling and reduces user steps. Clear result interpretation and rapid turnaround time enable confident decision-making during routine at-home self-testing, with clear guidance provided for users worldwide.

VMD150ST	Strep A v2.0 Test Kit	1/2/5 T

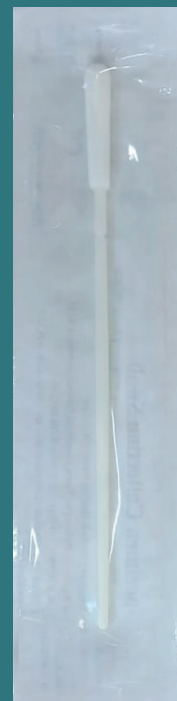

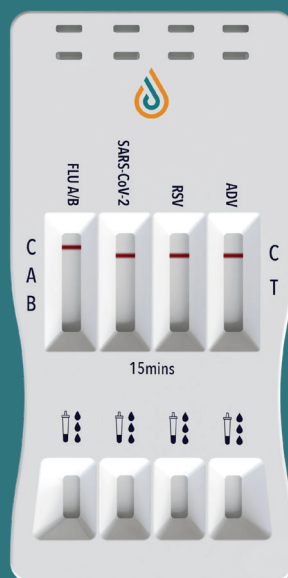

SARS-CoV-2 + FLU A/B + RSV + ADV Test Kit (Nasal)

Designed for convenient self-testing, this combined nasal test enables rapid detection of SARS-CoV-2, Influenza A/B, RSV, and Adenovirus from a single sample. The single-buffer, multi-result cassette simplifies operation while delivering clear, easy-to-read results. Rapid turnaround time supports timely decision-making during at-home respiratory symptom assessment and helps users manage infections responsibly without complex procedures or equipment.

Biohazard Bag (Optional)

Band Aid (Optional)

Instructions for Use

 Box contents may vary depending on the type of test.

Vitamin D Test Kit

Ideal for personal health monitoring, this rapid test provides a simple way to assess Vitamin D levels using a small blood sample. The intuitive procedure supports clear result interpretation without unnecessary complexity. Fast results help users understand their Vitamin D status promptly, supporting informed lifestyle and nutritional decisions during routine at-home wellness monitoring with confidence and daily balance.

Ref No	Name	Kit Size
VMD64ST	Vitamin D Test Kit)	1/2/5 T

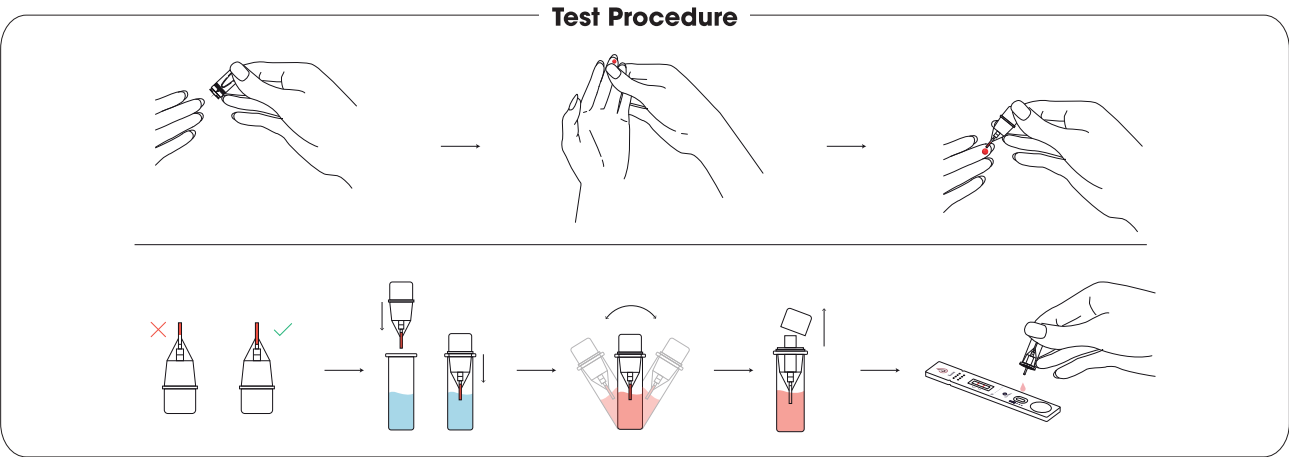

Ferritin Test Kit

Focused on everyday wellness insights, this rapid ferritin test offers a simple way to evaluate iron storage levels using a small blood sample. The streamlined procedure supports clear result interpretation without technical complexity. Fast results assist users in recognizing potential deficiency trends early, encouraging timely lifestyle adjustments or professional consultation during routine at-home health monitoring for improved awareness.

Ref No	Name	Kit Size
VMD97ST	Ferritin Test Kit	1/2/5 T

tumor marker tests

Name	Kit Size
FOB Test Kit	1/2/5 T
PSA Test Kit	1/2/5 T

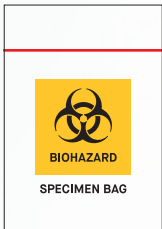

BOX CONTENT

Toilet Liner

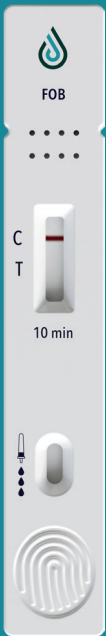

Instructions for Use

 Box contents may vary depending on the type of test.

FOB Test Kit

Supporting preventive health awareness, this rapid FOB test enables convenient at-home screening for hidden blood in stool samples. The simple collection process supports clear result interpretation without discomfort. Fast results help users recognize potential concerns early, encouraging timely medical consultation and informed follow-up decisions during routine colorectal health monitoring with confidence and discretion for everyday personal home use.

Ref No	Name	Kit Size
VMD09ST	FOB Test Kit	1/2/5 T

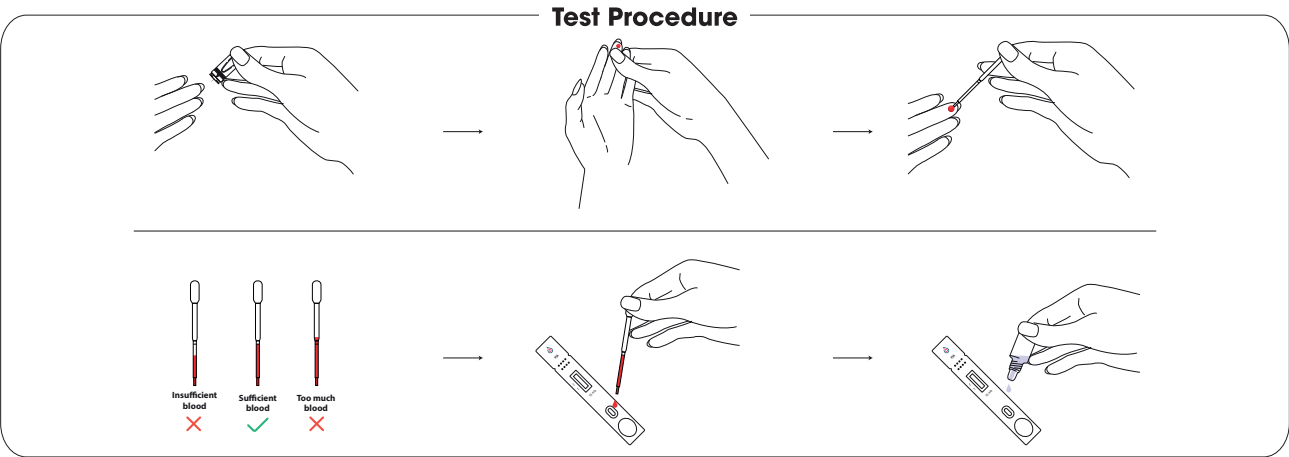

PSA Test Kit

Designed to support early prostate health screening, this rapid PSA test enables convenient at-home testing using a small blood sample. The straightforward procedure allows clear result interpretation without technical complexity. Fast results help users identify elevated PSA levels at an early stage, encouraging timely discussion with healthcare professionals during routine self-testing and ongoing personal health monitoring.

Ref No	Name	Kit Size
VMD46ST	PSA Test Kit	1/2/5 T

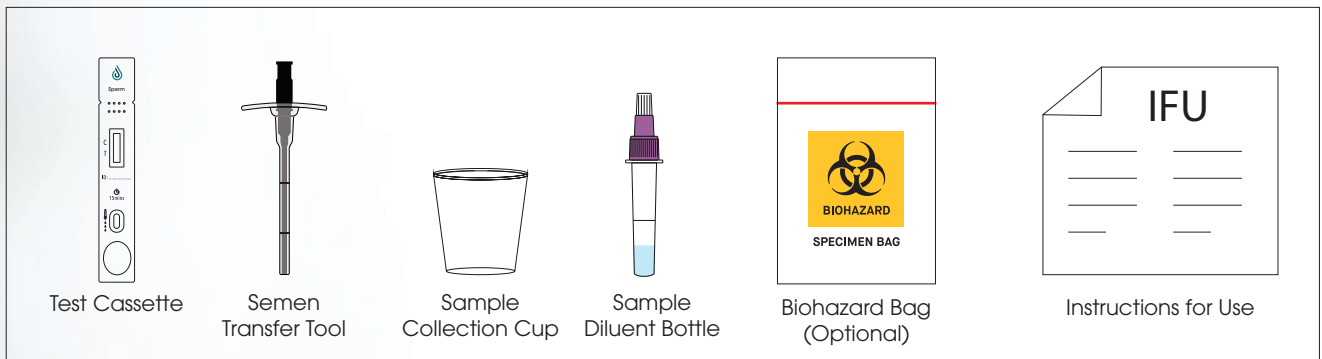

fertility tests

Name	Kit Size
Sperm Concentration Test	1/2/5 T
Early Pregnancy Test Kit	1/2/5 T
Ovulation LH Test Kit	1/2/5 T
FSH (Menopause) Test Kit	1/2/5 T

SPERM CONCENTRATION TEST BOX CONTENT

⚠ Box contents may vary depending on the type of test.

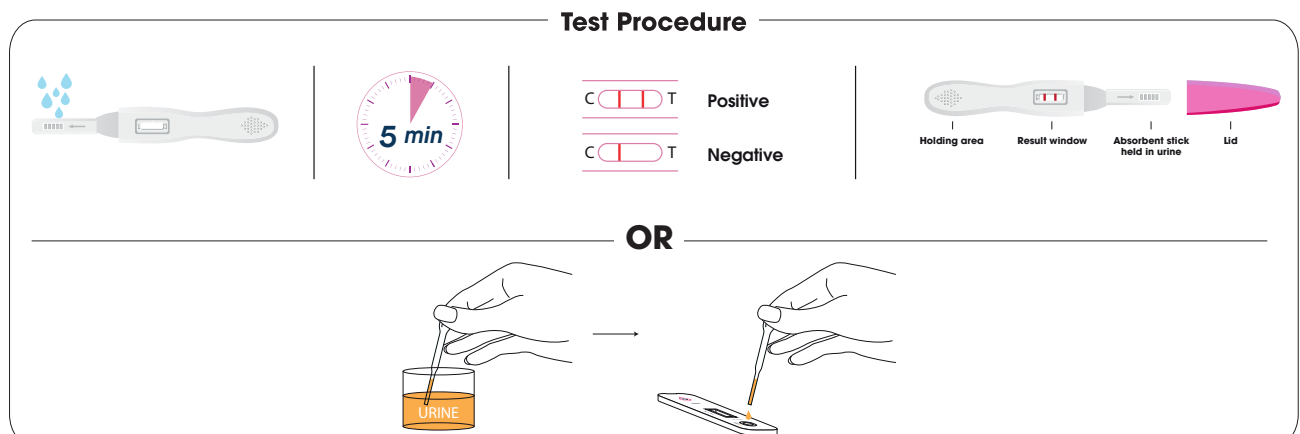

Early Pregnancy Test Kit

Designed to offer flexible testing options, this early pregnancy test detects pregnancy hormones at very early stages using urine samples. Available in cassette and mid-stream formats, it adapts to different user preferences. Clear results within minutes provide timely reassurance, supporting confident next steps during private at-home testing without complicated procedures, special equipment, or prior testing experience for users.

Ref No	Name	Kit Size	Cut-off
VMD59MST (Midstream)	Early Pregnancy Test Kit	1/2/5 T	10 mIU/ml
VMD59CST (Cassette)	Early Pregnancy Test Kit	1/2/5 T	10 mIU/ml
VMD59SST (Strip)	Early Pregnancy Test Kit	1/2/5 T	10 mIU/ml

Ovulation LH Test Kit

Supporting fertility planning, this ovulation LH test helps identify fertile days by detecting the luteinizing hormone surge in urine samples. Available in cassette and midstream formats, it offers flexible testing options. Clear results within minutes support accurate cycle tracking, enabling informed timing decisions during routine at-home fertility monitoring without complicated steps or additional equipment.

Ref No	Name	Kit Size	Cut-off
VMD61MST	Ovulation LH Test Kit	1/2/5 T	25 mIU/ml

digestive tract tests

Name	Kit Size
H.Pylori Test Kit	1/2/5 T
Gluten Intolerance Test Kit	1/2/5 T

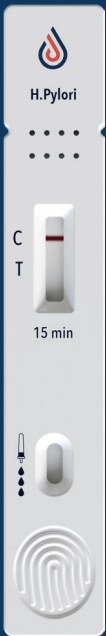

BOX CONTENT

 **Box contents may vary depending on the type of test.**

H.Pylori Test Kit

Providing a convenient option for digestive health screening, this rapid H. pylori test supports at-home detection using a simple sample collection method. The user-friendly design allows clear result interpretation within minutes. Fast results help individuals recognize potential infection early, supporting timely action and informed discussions with healthcare professionals during routine self-testing at home with confidence and personal reassurance.

Ref No	Name	Kit Size
VMD16ST	H.Pylori Test Kit	1/2/5 T

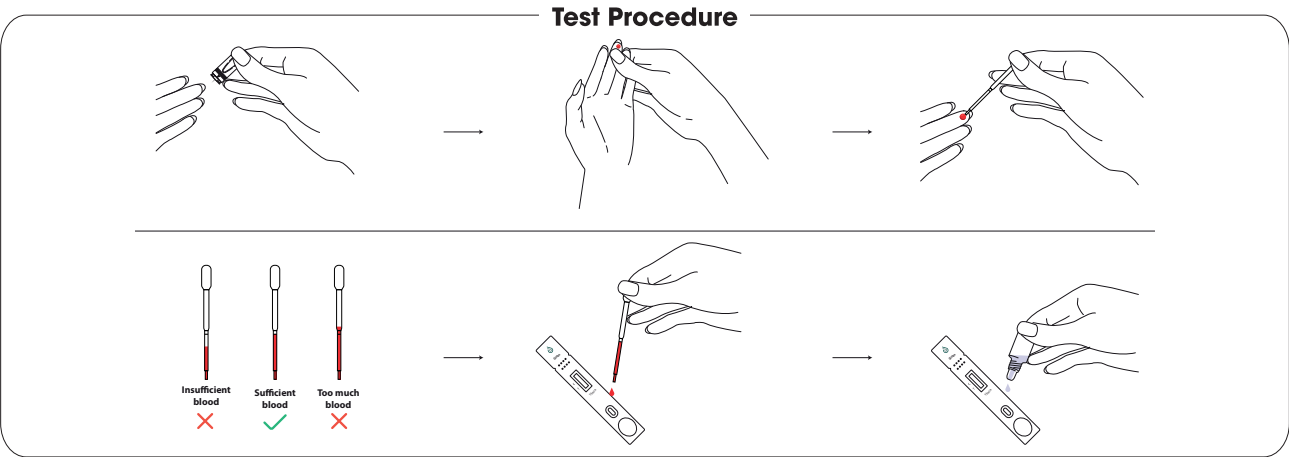

Gluten Intolerance Test Kit

Supporting dietary awareness, this rapid gluten intolerance test helps identify potential sensitivity using a small blood sample. The straightforward procedure enables clear result interpretation within minutes. Fast results assist users in understanding gluten-related responses early, supporting informed nutritional choices and confident discussions with healthcare professionals during routine at-home testing for everyday digestive wellness monitoring and long-term dietary management.

Ref No	Name	Kit Size
VMD63ST	Gluten Intolerance Test Kit	1/2/5 T

allergy test

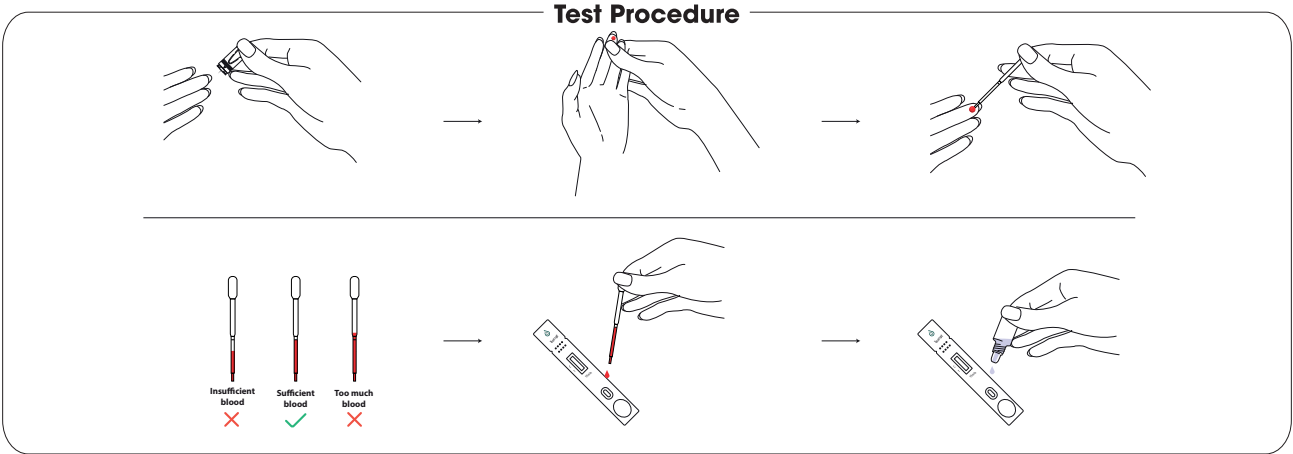

Total IgE Test Kit

Designed to support allergy screening, this rapid Total IgE test helps assess overall allergic response using a small blood sample. The intuitive procedure allows clear result interpretation within minutes. Fast results assist users in identifying elevated IgE levels early, supporting informed lifestyle adjustments and discussions with health-care professionals during routine at-home monitoring.

Ref No	Name	Kit Size
VMD121ST	Total IgE Test Kit	1/2/5 T

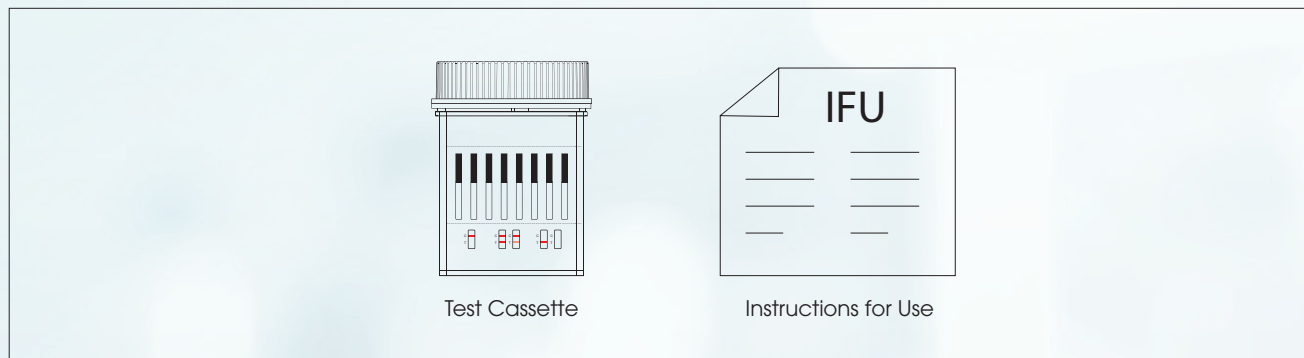

toxicology tests

Covering diverse toxicology needs, these rapid drug tests support convenient self-screening for alcohol and multiple substances. Available in cassette, cup, and saliva formats, they accommodate different user preferences. Clear visual results and fast turnaround enable informed decisions during routine workplace, on-site, or personal screening without professional equipment or specialized training, suitable for use across varied non-professional settings worldwide.

Name	Kit Size
Saliva Multi-Drug Test Kit	1/2/5 T
Saliva Multi-Drug Test Cup	1/2/5 T
Urine Multi-Drug Test Cup	1/2/5 T
Urine Multi-Drug Test Cup (Key Cup)	1/2/5 T
ALC (Alcohol) Test (Saliva)	1/2/5 T
